

ALBERTA'S
AGRICULTURAL
PROCESSING
INDUSTRY

Directory

Alberta
AGRICULTURE

January, 1989

The agriculture sector is one of Alberta's most vital industries and a key economic strength. As an employer, a creator of revenue and a provider of food it affects the lifestyle of every Albertan.

The Alberta government recognizes the importance of this valuable industry and has placed a high priority on its development and growth. Accordingly, the government encourages the strengthening of this province's value-added agricultural processing industry.

Alberta's secondary agri-food sector continues to show impressive development. A multi-billion dollar industry, it employs thousands of people across the province in processing, manufacturing, transporting and retailing agricultural and food products. As part of our effort to promote further expansion in this essential sector, Alberta Agriculture is pleased to provide the "Directory of Alberta's Agricultural Processing Industry."

The directory, a reliable index of the names, locations and products of members of Alberta's agricultural processing industry, has been designed to help the business community, government agencies and all other interested parties keep pace with the rapid development taking place in agri-food processing. In compiling the directory, we have made every effort to ensure complete and accurate information as of the date of printing.

It is with great pleasure that I bring you the latest edition of the "Directory of Alberta's Agricultural Processing Industry". I trust it will be a helpful reference for you as well as an important tool in the further advancement of Alberta's agri-food processing industry.

A handwritten signature in black ink, reading "Peter Elzinga".

Peter Elzinga
Minister of Agriculture

FOREWORD

The Marketing Services Division of Alberta Agriculture presents this Directory of Alberta's Agricultural Processing Industry as a reference for the business community, government agencies and other interested parties. It serves to update users with current company information including contact personnel, products and brand names.

The directory is divided into three sections: (1) List of firms by category, (2) Alphabetical list of firms, (3) List of firms by location. In section 1, the firms are listed under a broad industry category which represents their major activity and not necessarily under each category in which they participate. A category description precedes each listing. The alphabetical listing of companies (section 2) has been page-referenced for convenience. You may wish to refer to the Alberta map when using the location listing in section 3.

Considerable effort has been made to ensure accuracy of the company listings and information and we regret any errors or omissions. We ask your assistance in keeping this guide current. As changes occur in the information presented for any company listed, or if you are an Alberta processor and wish to be included in the next edition, please contact:
